## Autos and Electric Vehicles

1250+ US Consumers Balanced to Census

**CHECK BREAKDOWN:****TREND CHECKS****EVs – Sentiment Favorable/Consistent Sequentially**

- ❑ Based on consumer feedback, EVs are projected to gain share over the next upgrade cycle. IE – a higher percentage of those who plan to purchase a vehicle in the future plan to get electric (~30%) compared to the percentage of current auto owners who say they own electric (~5-10%).
- ❑ Consumer attitudes toward autonomous features and toward electric vehicles have been relatively consistent sequentially over the past year. Younger respondents are more likely than older respondents to prefer EVs.
- ❑ Consumers are still not sold on the safety of autonomous vehicles. If anything, they have been increasingly likely to believe humans driving themselves is safer.

**Rivian and Lucid Awareness Increases, Tesla Brand Driving Interest**

- ❑ Familiarity with Rivian and Lucid has improved q/q, with Rivian familiarity increasing more than Lucid.
- ❑ Consumer sentiment toward the appearance/look of Rivian, Lucid, and Firsker was consistent q/q. Similar to last quarter, consumers do not offer a favorable opinion of the Cybertruck's appearance from Tesla.
- ❑ Tesla is the brand respondents would be most likely to choose if price was no object. Over the past year, those with interest in getting a Tesla have been increasingly likely to say they want one because they like the brand and/or look/status of the car.

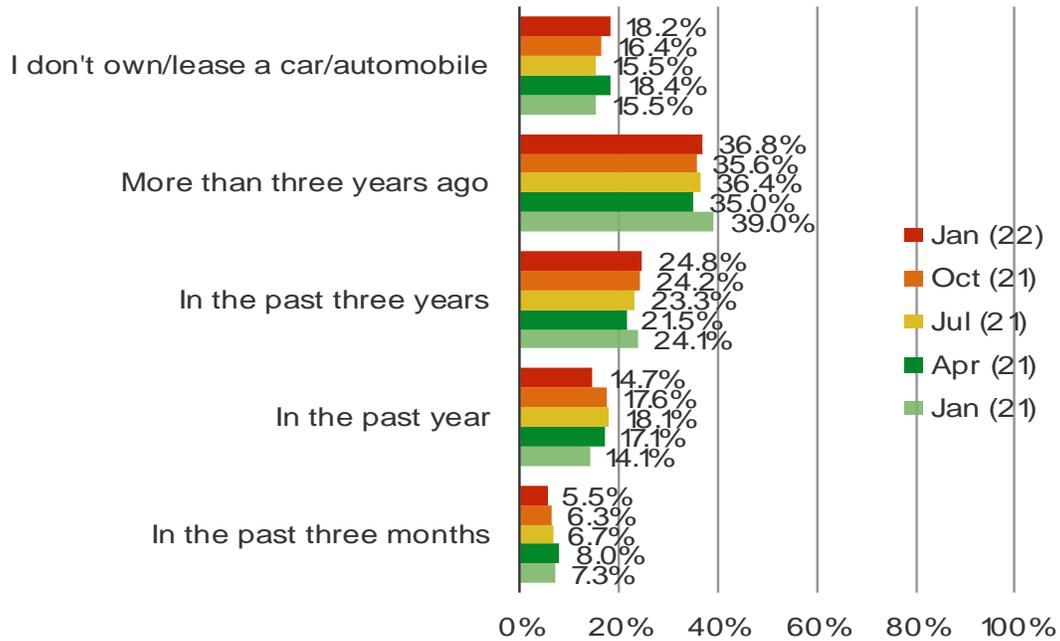

**Auto Purchasing Trends**

- ❑ Auto purchasing intentions ran hotter during the pandemic. Purchase intentions aren't yet at pre-pandemic levels, but they have cooled a bit sequentially.
- ❑ Over the past year, intentions have shifted a bit in favor of new over used.
- ❑ In 2020 and 2021, higher end / luxury brands trended higher when it comes to which brand those considering a new car in the next 6 months would be most likely to choose (at the expense of non-luxury). That trend has shown signs of starting to reverse over just the last couple of months.
