NEW QUESTIONS

WHICH DO YOU PREFER?

Posed to all respondents.

Optional Comments Analyzed Via LLM...

- Drive Myself / Have a Car: 37.69%**
The biggest barrier for both ride-shares and taxis is simply vehicle ownership. The vast majority of respondents pointed out they prefer to drive themselves in their own personal vehicle.
- Don't Use / Don't Need / Not Interested: 16.08%**
These consumers just never use these services, have no access to them, or explicitly state they have no interest.
- Convenience / Easy / Fast: 7.54%**
For those who do express a preference, convenience (usually citing the app, upfront pricing, or speed) is the top reason.
- Safety / Trust / Bad Experiences: 6.03%**
A notable contingent avoids these services due to safety concerns (e.g., "creepy drivers," "don't trust strangers," or "unsafe").
- Price / Cheaper / Cost: 6.03%**
- Better Service / Cleaner / Friendly / Reliable: 4.52%**
- Not Available / Location / Rural Area: 3.02%**
- Convenience & Price (Respondent cited both): 2.01%**
- Use Alternative Transport (Walk, Bike, Friend's Car): 1.01%**
- Autonomous Vehicles (Waymo, Tesla): 1.01%**
- Other / Unclassified: 15.08%**

WHAT DO YOU USE UBER RIDE SHARING FOR?

Posed to all respondents who use Uber.

Primary vs. Secondary Uber Use Cases

Use Case Category	Primary Use Case	Other / Secondary Use Cases
Work / Commute / School	20.94%	8.37%
General Transportation / Getting Around	11.45%	8.54%
Airport / Travel / Vacation	10.25%	10.51%
Events / Social Gatherings / Entertainment	8.51%	13.63%
Doctor / Medical Appointments	8.29%	4.27%
Bars / Night Out / Avoid Drinking & Driving	6.65%	7.22%
Food Delivery / Restaurants	6.22%	5.25%
Car Trouble / In Shop / Don't Own a Car	5.13%	8.70%
Shopping / Errands / Groceries	4.58%	5.09%
Emergencies	0.87%	2.46%
Other / Unclassified	17.12%	25.94%

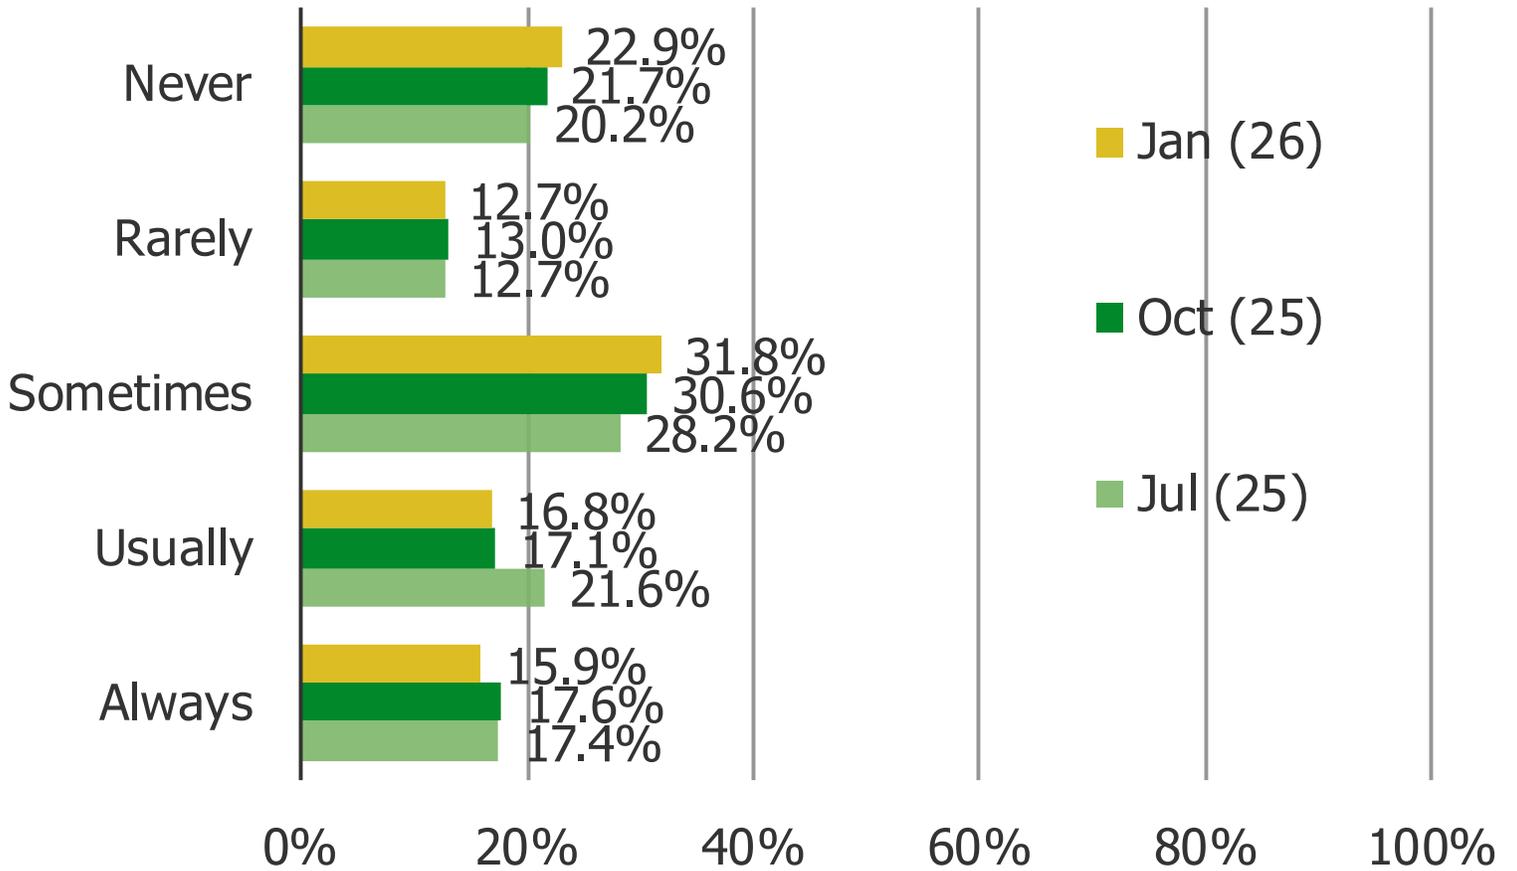

Key Takeaways from the Split:

- 1. Work is the Anchor (Primary):** Getting to work, school, or the office is overwhelmingly the core reason people rely on Uber as their *primary* transportation service (nearly 21%). However, it drops significantly (to 8%) as a secondary use case, meaning if you use Uber for work, it's usually your #1 reason for having the app.
- 2. Medical Rides are Core Utilities (Primary):** Using Uber to get to the doctor or hospital is highly indexed as a primary use case (8.3%) but rarely thought of as a secondary use case. This points to a specific demographic (likely older or car-less individuals) who rely on Uber specifically for healthcare logistics.
- 3. Events and Car Troubles are the Fill-Ins (Secondary):** When consumers list their *secondary* reasons for using Uber, "Events & Entertainment" (going to concerts, dates, etc.) jumps to the #1 specific spot at nearly 14%. Additionally, using Uber when a "car is in the shop" jumps up as well. This indicates that a large portion of the user base relies on Uber strictly as a backup utility for when they are going somewhere with bad parking or when their primary vehicle breaks down.

*Data on this page analyzed via LLM.

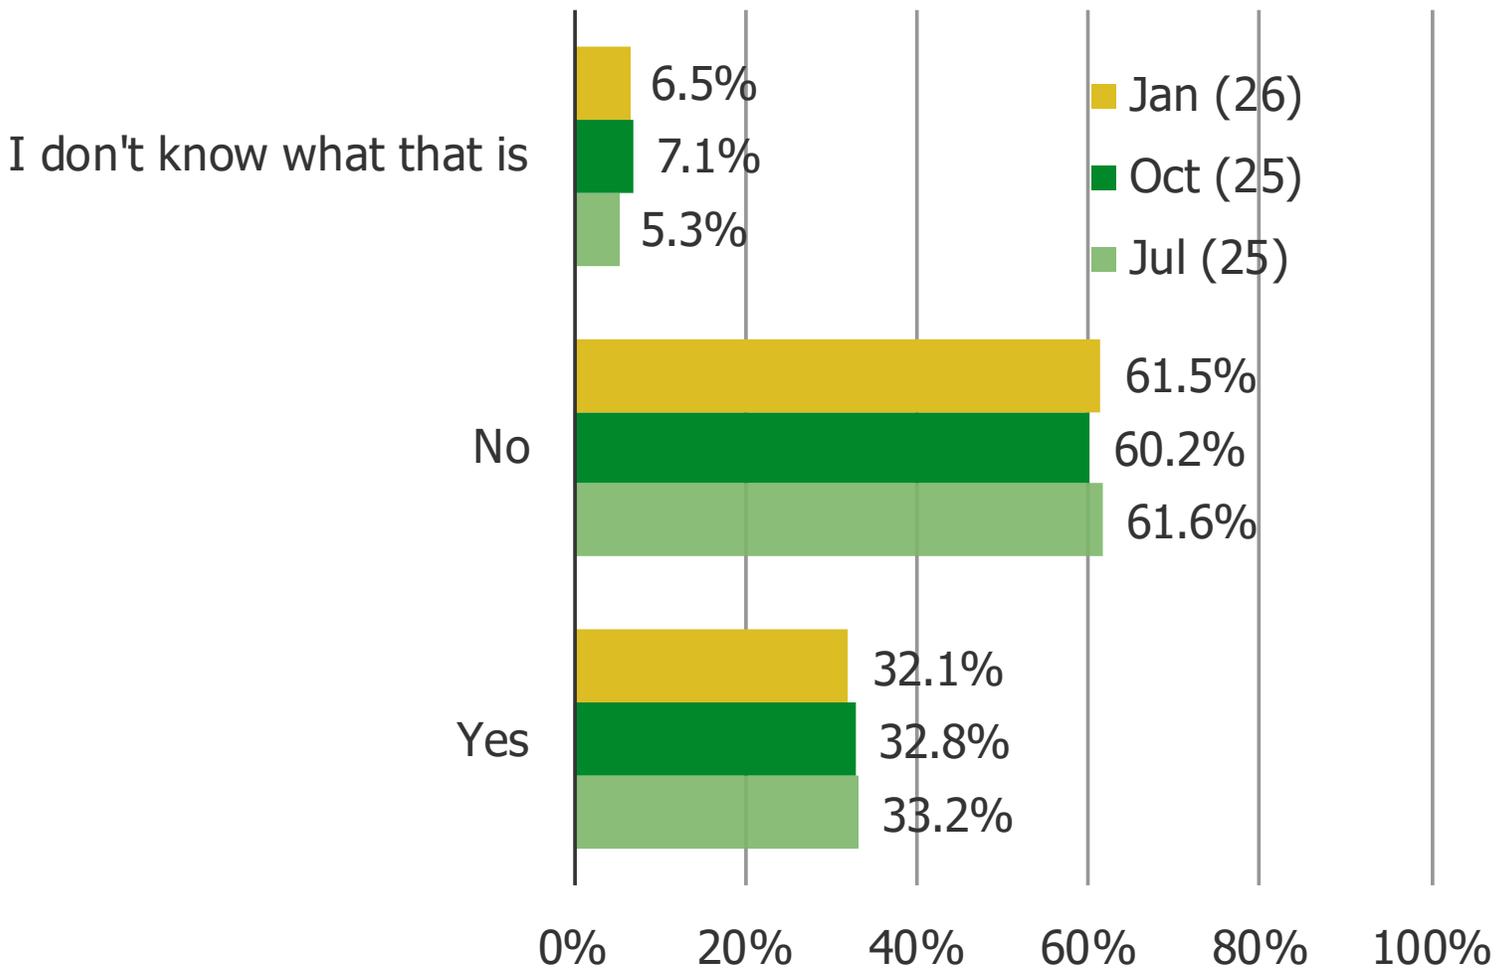

HOW OFTEN DO YOU CHECK LYFT AFTER SEARCHING FOR A RIDE ON UBER?

Posed to all respondents who use Uber.

ARE YOU A SUBSCRIBER OF UBER ONE?

Posed to all respondents who use Uber.

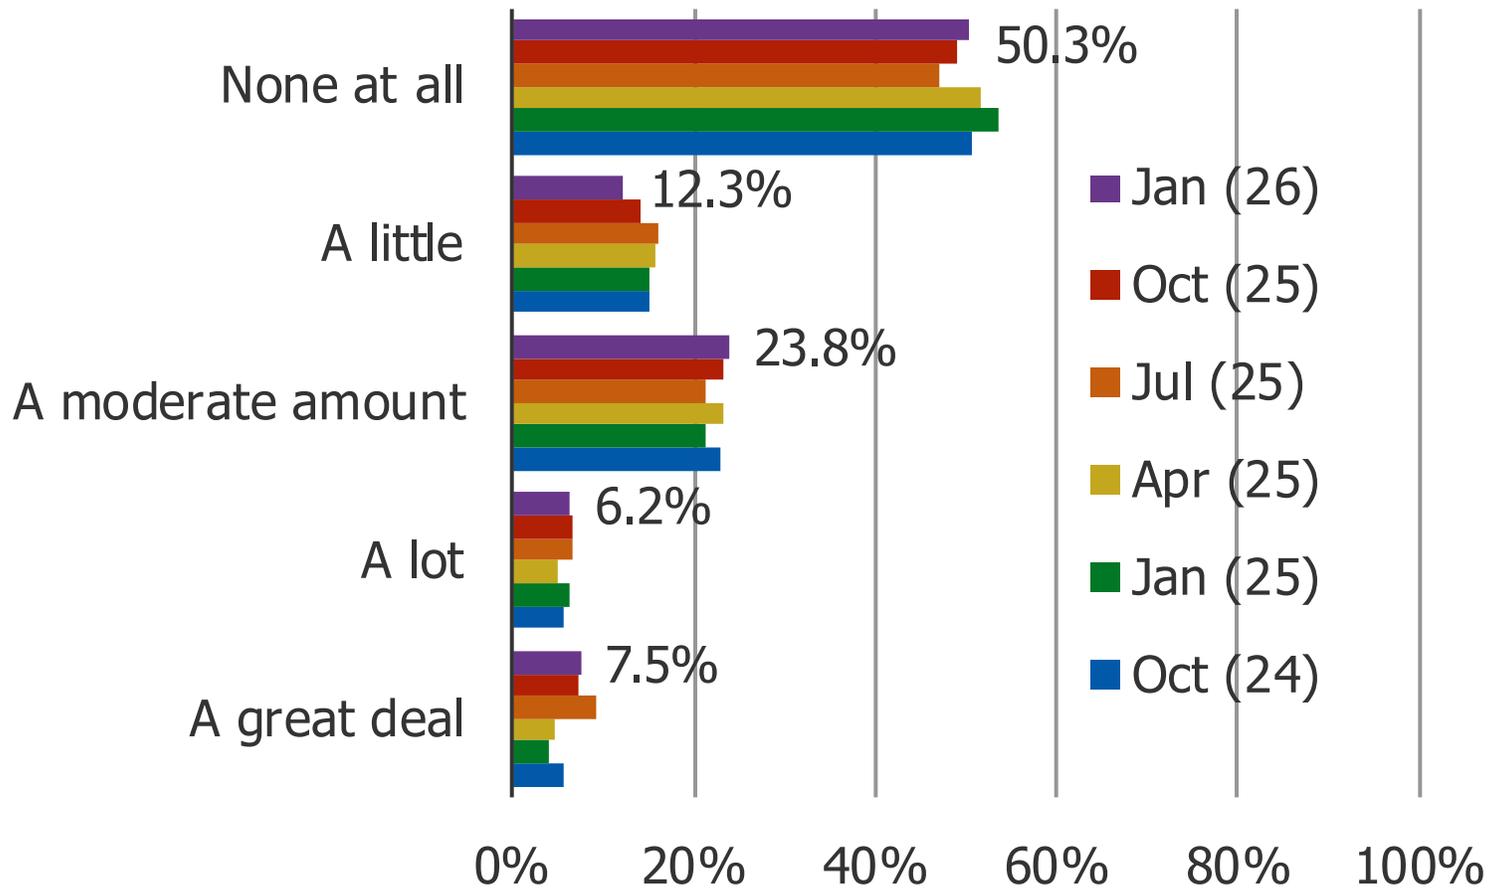

Ride Sharing

PLATFORM DYNAMICS

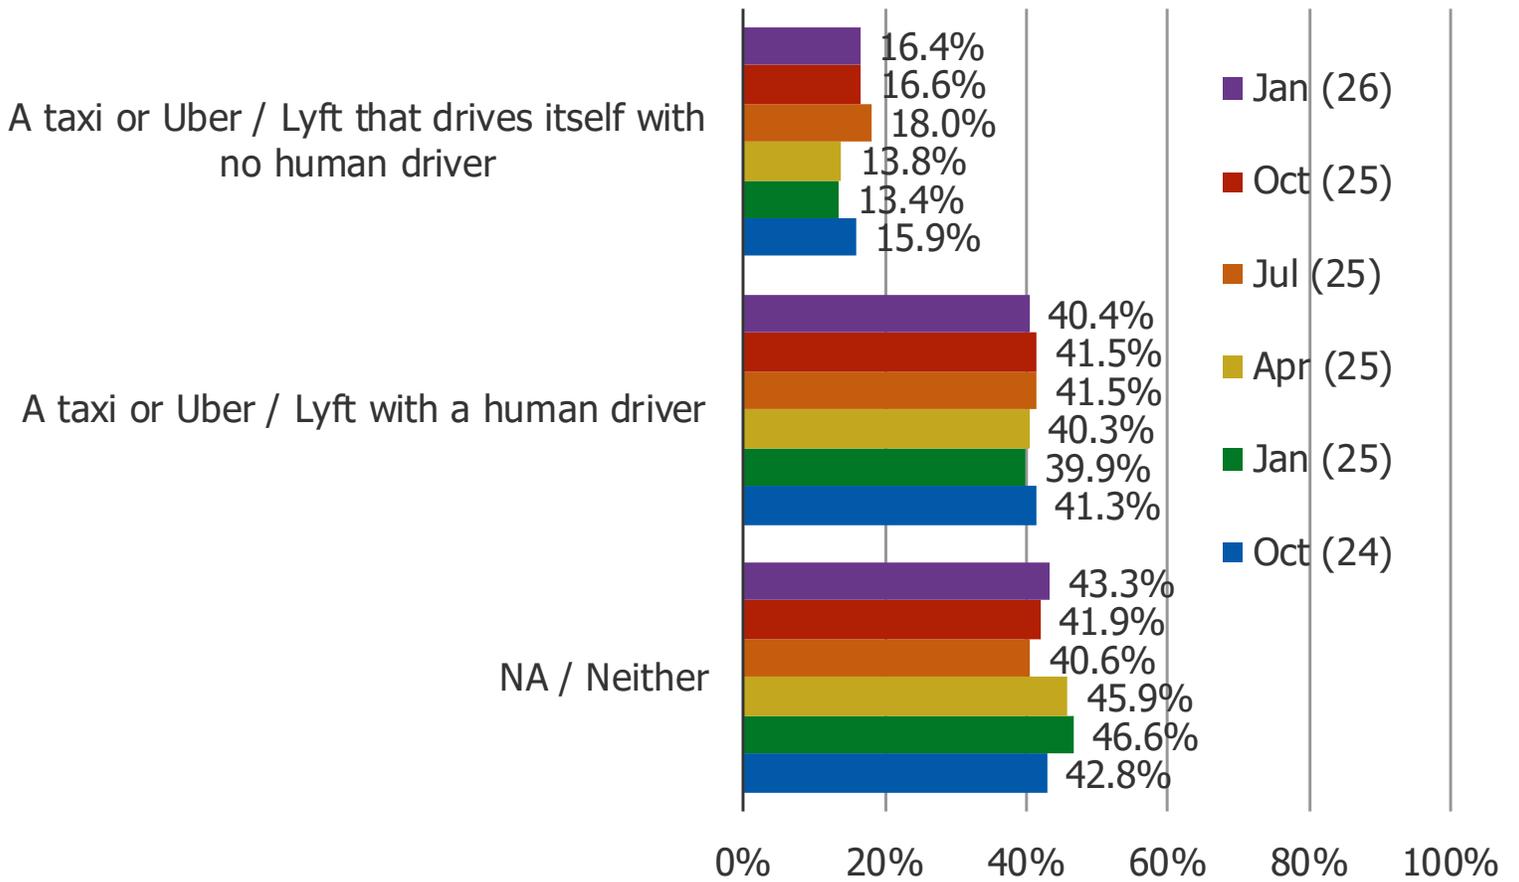

HOW MUCH TRUST WOULD YOU HAVE IN USING A ROBOTAXI SERVICE? IE - LIKE UBER OR LYFT, BUT A DRIVER-LESS CAR.

Posed to all respondents...

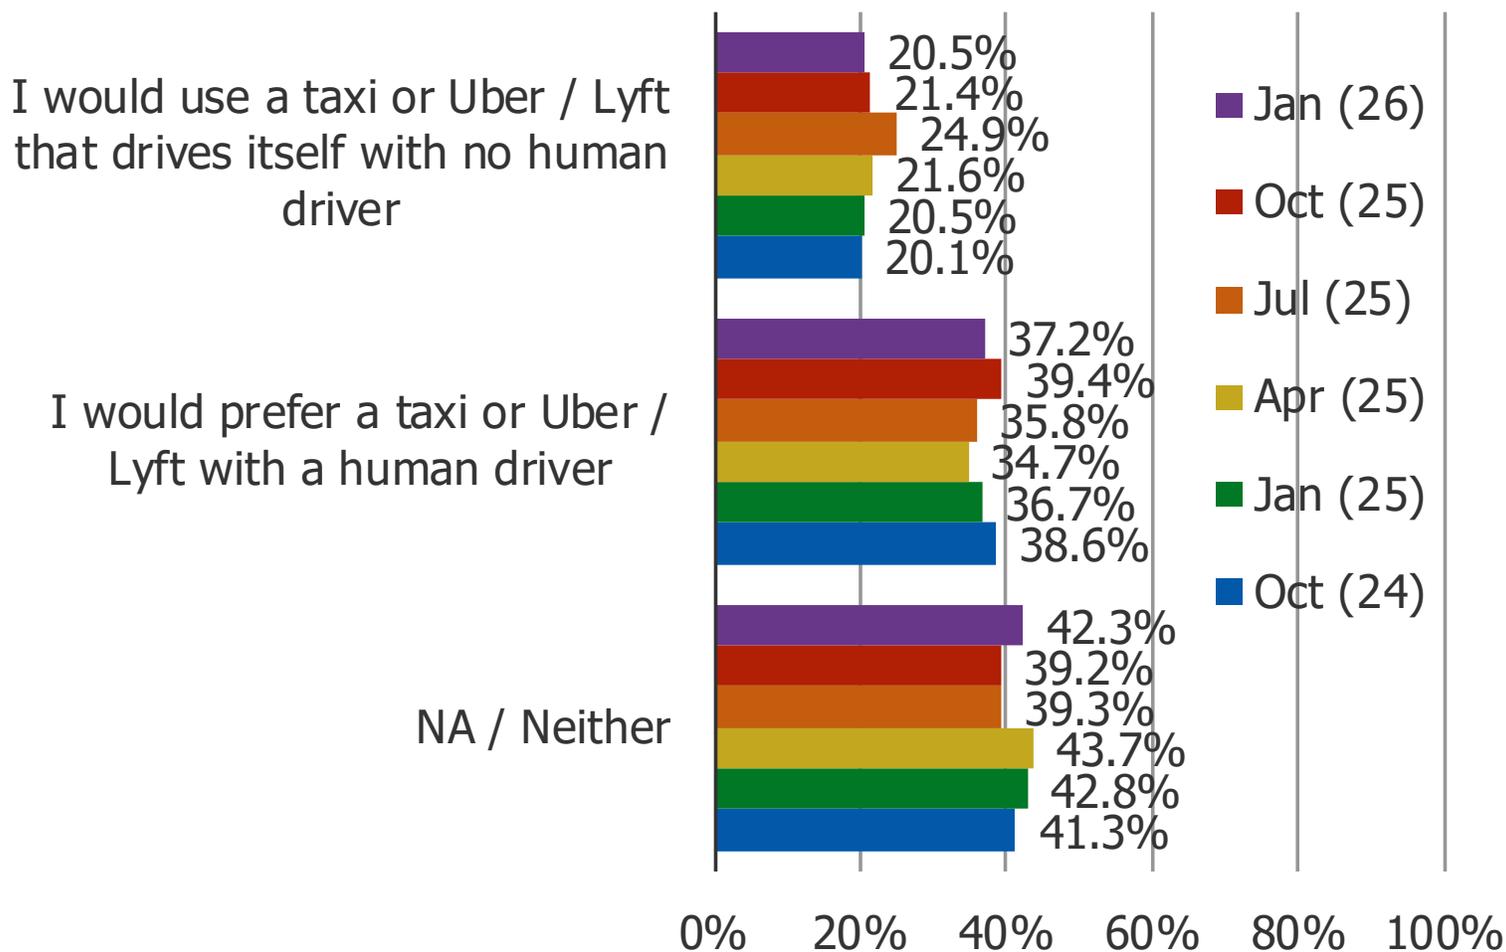

IF IT WAS THE SAME PRICE, WHICH WOULD YOU PREFER?

Posed to all respondents...

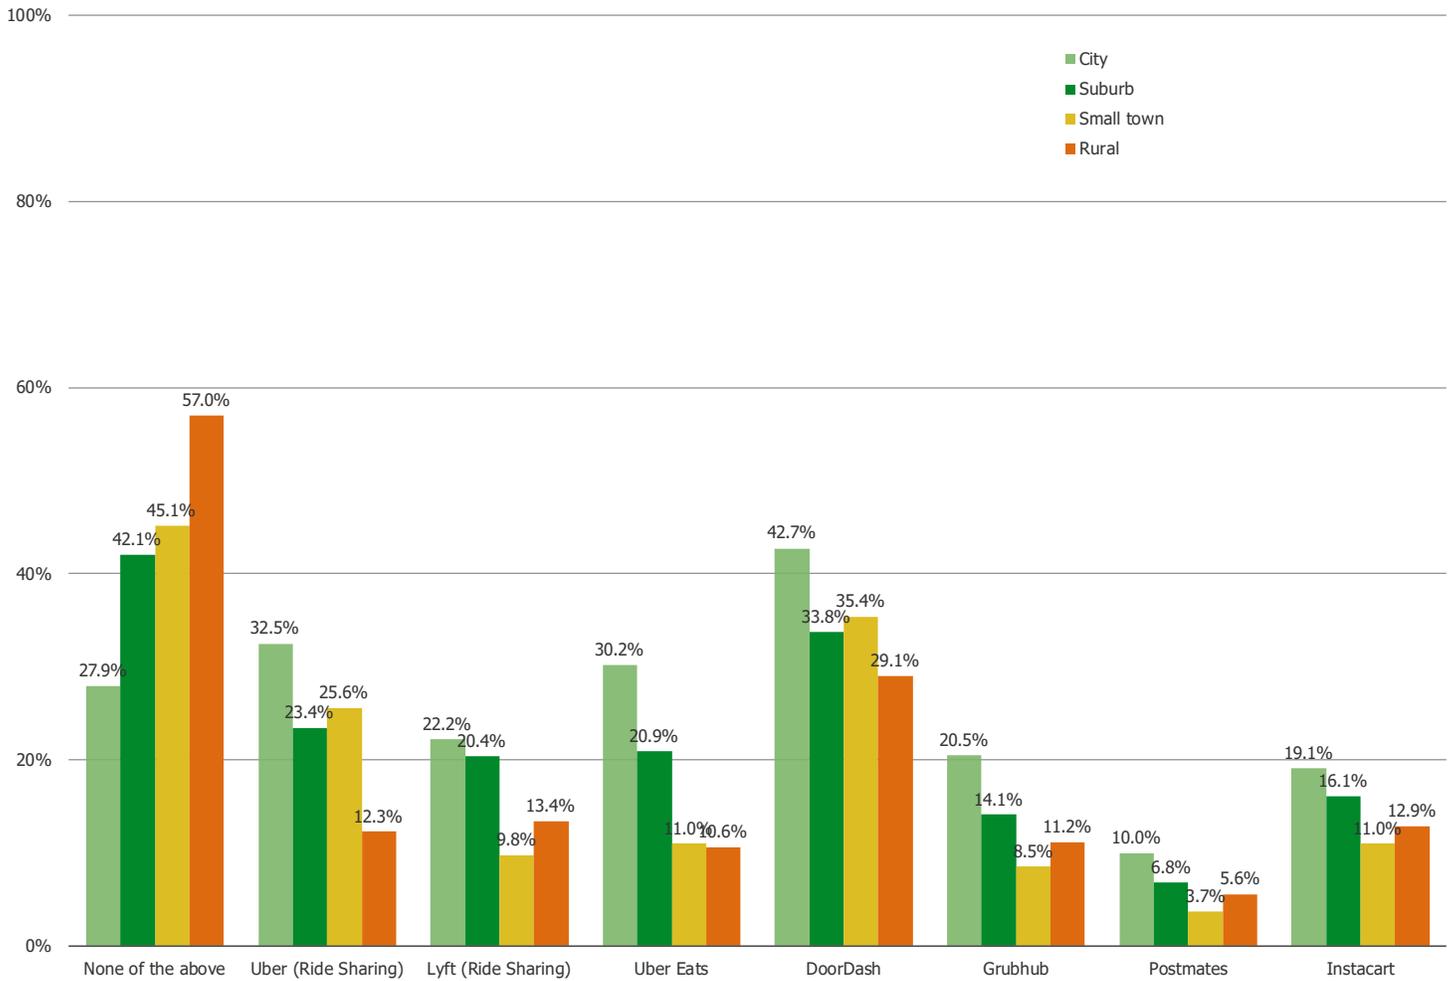

WHAT IF SELF-DRIVING TAXIS OR UBER / LYFTS WERE CHEAPER THAN HAVING A HUMAN DRIVER?

Posed to all respondents...

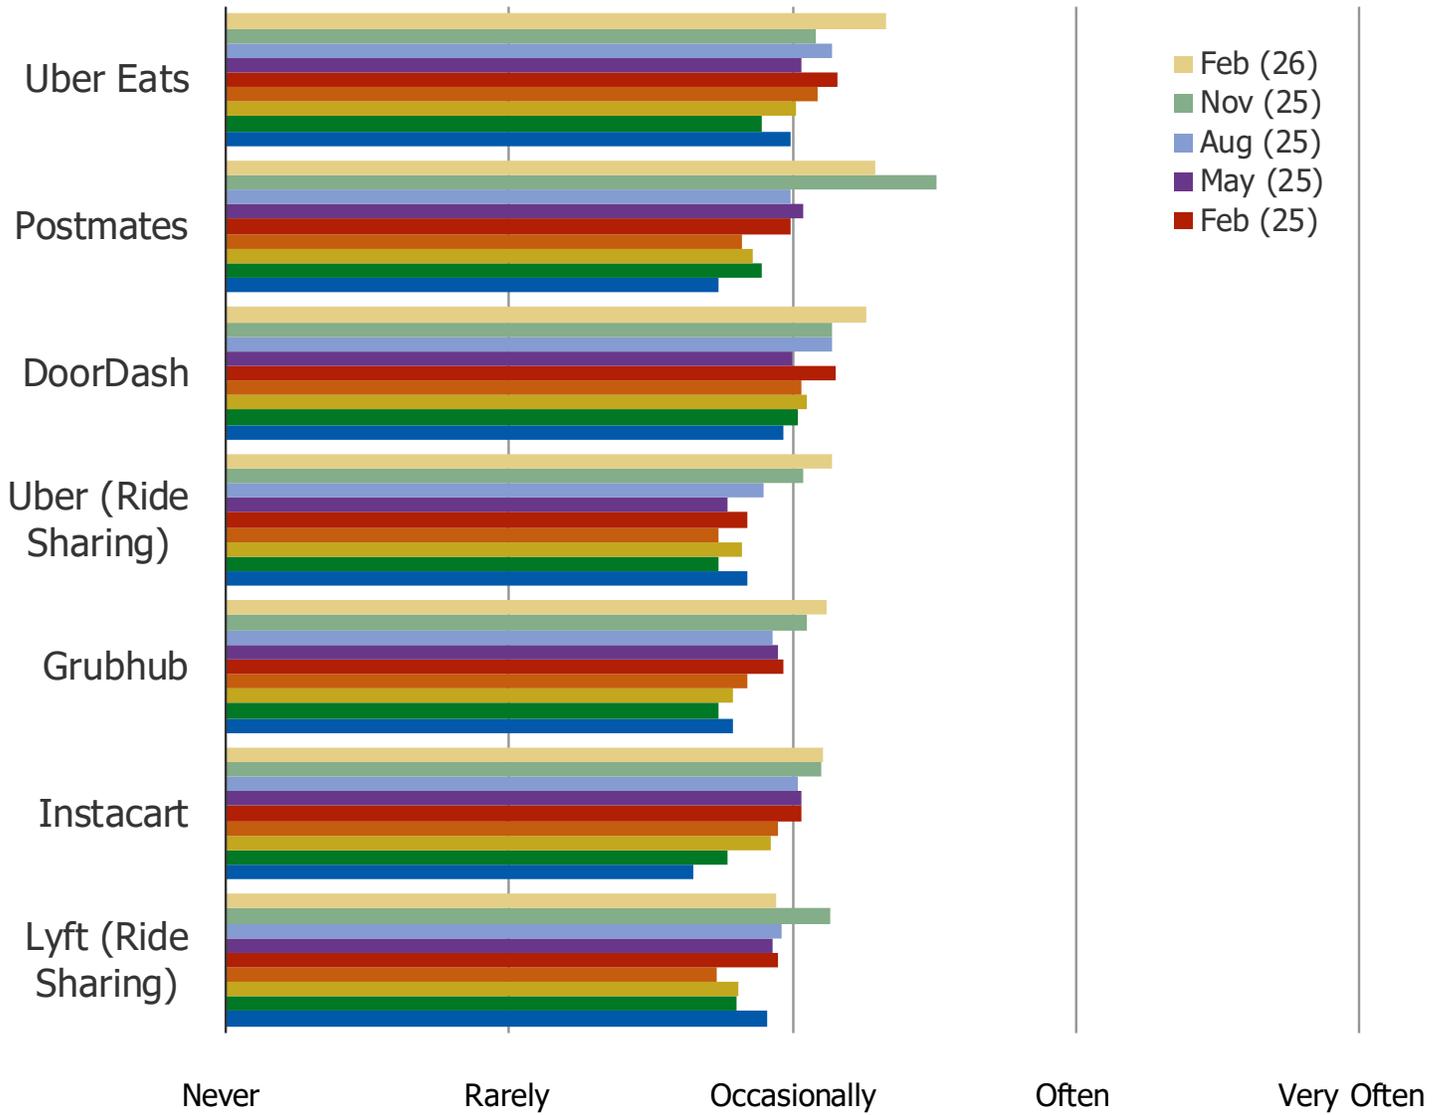

HAVE YOU EVER USED ANY OF THE FOLLOWING APPS/PLATFORMS? SELECT ALL THAT APPLY
